2022 智能生态融合大会 —— 光·智·场景与平台融合及应用

Smart Ecosystem Conference 2022 — The Integration and Application of Light and Intelligence Scenario and Platform

近几年，随着数字技术与智能系统不断融合，市场开始意识到全宅智能不仅是一种流行语，而且是一种真正改变人们生活体验的空间服务形态。加上消费者需求的强劲增长，全宅智能绽放出新市场机遇。但同时由于智能产业链涉及面庞大复杂，且单一的产品或系统难以为用户展示完整的智能化服务体验，所以打造互联互通、平台连接，生态融合的产业模式已成为未来发展的必然趋势。针对这样大趋势，由广州光亚法兰克福展览有限公司主办的“2022 智能生态融合大会”即将在 2022 年 8 月 3 - 6 日盛大举办！更借助同期召开的行业盛会——广州国际建筑电气技术展览会，旨在为身处于新基建趋势下数字经济洪流中的各方寻找机遇，把握机遇，促进技术交流、产品互联、实现更多的项目合作，推动智能产业稳定增长、融合优化升级。

【亮点】:

- 一. 名企云集，大咖与专家的思想火花碰撞
- 二. 智能产业新技术、新产品、新方案的全方位展示
- 三. 数实融合加速，市场机遇把握

With the continuous integration of digital technology and intelligent systems in recent years, home automation is not just a slogan but literally changing people's life experiences. In addition, the consumption demand is highly increasing, home automation market is becoming a shining star. However, the industry chain of smart products is huge and complicated, an individual product and system may not be able to deliver a complete smart service experience. Therefore, creating an industrial model of interconnection, platform connection, and ecological integration has become an inevitable trend. The forum focuses on the trend and provides an industry platform for promoting technical exchanges, product interconnection, and more project cooperation.

【Highlight】:

1. Leading enterprises representatives and experts brainstorm
2. Showcase new technologies, new products and new solutions in the smart industry
3. The acceleration of digital and practical integration seizes the market opportunity

Guangzhou Guangya Messe Frankfurt Co Ltd join hands with the associations to organize a forum, aim to help the hotels, real estate properties, commercial complexes, universities, hospitals and other industries to achieve the construction planning, equipment procurement, environmental protection and energy saving in one go. The "Proposal of the Central Committee of the Communist Party of China on the 14th Five-Year Plan for National Economic and Social Development and the Visionary Goals for 2035" clearly states that during the 14th Five-Year Plan period, the new development concept of innovation, coordination, sustainability, openness and sharing will be implemented unwaveringly. Enterprises will pay more attention to their social responsibility and environmental development, and at the same time, in order to collect more new technologies and products related to enterprise engineering. New products and new achievements to guide the industry to develop green business methods, provide sustainable service products and create a healthy consumption environment, so as to improve the profit margin of enterprises and make greater contributions to society.

2022 广州 “智慧建筑操作系统” 专家论坛

Guangzhou "Intelligent Building Operating System" Seminar 2022

2021年，中国建筑学会标准 T/ASC19-2021《智慧建筑设计标准》，首次提出“建筑大脑”、“智慧建筑操作系统”的概念，随着智慧医院、智慧学校、智慧文旅、智慧酒店、智慧社区、全宅智能等，越来越多以场景服务为导向的市场需求快速崛起，现有的“主要面向各类建筑机电设备控制”的智能化建筑设计，显然已经难以满足。2022广州“智慧建筑操作系统”专家论坛，将邀请参与中国建筑学会标准 T/ASC19-2021《智慧建筑设计标准》编制专家：广东省建筑设计研究院智慧城市与建筑智能化技术研究中心总工程师 龚仕伟、深圳建筑设计研究总院副总工程师蔡丹确，共同围绕“智慧建筑操作系统设计思路”作深度思考。结合我国十四五规划，对智慧城市政策的指导、同时结合业界楼宇自控操作系统实践、智慧建筑系统运维难点与经验、智慧建筑空间场景服务模式闭环等话题，展开深度探讨，为产业发展指明方向。

In 2021, the Chinese Institute of Architects standard T/ASC19-2021 "Intelligent Building Design Standard" put forward the concept of "Building Brain" and "Intelligent Building Operating System" for the first time. With the rapid rise of more and more scene service-oriented market demands such as intelligent hospitals, intelligent schools, intelligent cultural tourism, intelligent hotels, intelligent communities, intelligent homes, etc., it is obvious that the existing intelligent building design "mainly for the control of various types of building mechanical and electrical equipment" is difficult to meet. 2022 Guangzhou "Intelligent Building Operating System" expert forum, will invite experts involved in the preparation of China Institute of Architecture Standard T/ASC19-2021 "Intelligent Building Design Standard": Smart City and Intelligent Construction Research Center, Guangdong Architectural Design & Research Institute Chief Engineer Gong Shiwei, and Shenzhen Architecture Design General Research Institute (SZAD) Deputy Chief Engineer Cai Danzhi, will be invited to give in-depth thoughts on "Intelligent Building Operating System Design Ideas". Combined with China's 14th Five-Year Plan, the guidance of smart city policy, combined with the industry's building self-control operating system practice, intelligent building system operation and maintenance difficulties and experience, intelligent building space service business model closed loop and other topics, in-depth discussion, to point out the direction of industrial development.

2022 中国（广州）智能化集成商大会

China (Guangzhou) Intelligent Integrators' Conference 2022

随着人们对健康、安全、便捷、舒适的生活空间需求快速提升，中国智能市场成为各巨头的关注热点，迎来更多的投资机会，而包括全宅智能在内的智能化系统工程是多产品、多专业、跨行业的整合，系统集成，其存在的价值在于“集成”，集成多厂商的产品、信息和服务等，并借此产生价值增值。集成商可提供的许多服务，特别是综合性服务，往往是单一产品的生产商不能提供的。在这样的大趋势下，国内的系统集成商迎来前所未有的机遇和难题。

同时，集成商们要面对更加巨大的挑战：

- 一. 集成商的福音：集成服务越来越值钱
- 二. 单纯的分销代理商正被抛弃，销售服务一体化成为常态
- 三. 房地产商直接与厂商谈采购，集成商如何做才不被边缘化？
- 四. 全宅智能集成商能够突破业务收入瓶颈，实现亿元以上业绩吗？
- 五. 全宅智能集成商该如何搭上视频号直播的快车？……

想要破除这样的行业壁垒，不能继续依靠传统的对接模式。为了更好地服务全宅智能产业，搭建全宅智能产品厂商与用户、系统集成商之间的桥梁与纽带，指导全宅智能设计与定制安装企业更好地为房地产精装全宅智能项目、酒店客房智能项目、办公空间智能项目、住宅智能项目提供服务，由广州光亚法兰克福展览有限公司、千家智客共同主办的“2022 中国（广州）智能化集成商大会”即将在 2022 年 8 月 5 日隆重举办！

2022 中国（广州）智能化集成商大会

China (Guangzhou) Intelligent Integrators' Conference 2022

With the rapid rise of people's demand for healthy, safe, convenient and comfortable living space, China's intelligent market is large enough to be the rising stars within the leading enterprises, ushering in more investment opportunities. The intelligent system engineering including home automation is a multi-product, multi-professional and cross-industry integration. The core value of system integration is about "integration". Integrating different products, information and services from multiples vendors to generate value. System Integrators can deliver what manufacturers who produce single products could not provide, especially the comprehensive services. Under this trend, it gives an unprecedented opportunity to the local system integrators. Meanwhile, the integrators are also facing great challenges like:

1. Great news for the integrators: integration service become more valuable
2. Pure distributors are being abandoned, the package of sales and service delivery has become the norm
3. The property developers deal with manufacturers directly on purchasing, how can integration not be isolated?
4. Can home automation integrators break through the revenue bottleneck and achieve a performance of over 100 million RMB?
5. How can home automation integrators get benefits from live-stream?

Want to break such industry barriers, cannot continue to rely on the traditional interface model, build a bridge and link between smart home product manufacturers and users, system integrators, guide intelligent design and custom installation enterprises to provide better intelligent projects, hotel room intelligent projects, office space intelligent projects, residential intelligent projects, in order to better serve the intelligent industry.

Whole house customization, lighting design, intelligent home control, home entertainment audio and video systems, etc., originally in unrelated fields, in recent years more and more cross-border cooperation and cross-border integration of the situation. Now it is easy to see that all walks of life have emerged as a highly integrated development trend. Guests will be invited to share the industry dynamics, the new challenges of 2022 intelligent life, how to make choices and prepare for the future.
