Exhibition Overview

SPS – Smart Production Solutions Guangzhou concluded successfully on 27 February 2025 at Area A of the China Import and Export Fair Complex, attracting strong attendance from across the manufacturing sector. Drawing on the extensive resources of the global SPS network, the event welcomed a wide range of international exhibitors, presenting regional manufacturers with advanced smart manufacturing technologies and solutions from around the world. Through this convergence of global expertise, the platform continues to advance the intelligent transformation of the region's industries while enabling knowledge exchange and technological transfer across markets.

Exhibitor Feedback

Autonics Eletronics (Jiaxing) Co Ltd

Mr Yi Jung Hwang, Sales Director, China

We are a South Korean automation provider specialising in the R&D and manufacturing of automation products for the global market, including sensors, controllers, motion control devices, and industrial connectivity systems. At the event, we showcased our latest products, such as laser scanners and ultrasonic sensors, which attracted a great deal of attention from professional visitors and resulted in several business collaborations. The forums held alongside the exhibition provided an excellent platform for technical exchange, encouraging greater industry interaction. We look forward to continuing to grow our business through future SPS events.

Turck (Tianjin) Sensor Co Ltd

Mr Andy Du, Supervisor of Marketing & Training, Marketing & Product Management

We were impressed with how well the event was organised. The exhibition layout was innovative, on-site services were efficient, and every detail reflected careful planning. The organisers did an excellent job of promoting exhibitors in advance and curating high-quality forum sessions, enhancing the value of our participation. The audience, composed of industry professionals, brought valuable business opportunities to exhibitors. This platform will remain an important force in driving progress within the smart manufacturing sector.

HIKVISION

Mr Hongjing Lin, Scene Digitalisation Department Manager, Guangdong Business Centre

Over the last two decades, Hikvision has developed a comprehensive intelligent IoT (AIOT) platform, combining sensing, artificial intelligence and big data to provide security and digital solutions for a variety of industries. At SPS – Smart Production Solutions Guangzhou 2025, we showcased our latest advancements in enterprise digital solutions, which captured the attention of numerous professional visitors and government delegations. The event was also widely covered by industry media, further enhancing our brand's visibility.

Ningbo Sono Manufacturing Co Ltd

Mr Xinqiang Mao, Chairman

Our participation was driven by the event's strong influence in South China. As a specialised manufacturer of core components including pneumatic components, our products are widely used in new energy and other sectors. This edition demonstrated notable improvements in both visitor quantity and quality, with increased attendance from international buyers - particularly from Europe, India, and the Middle East - highlighting the event's global character. The exhibition serves as an excellent platform for overseas market expansion. We look forward to seeing greater international participation in future editions to further enhance its global impact.。

Guangzhou Jiawei Intelligent Control Technology Co Ltd

Factory Manager, Mr Xiangpeng Ning

To stand out in this competitive industry, we're working on two fronts: improving our operations while building our presence in both domestic and international markets. We saw strong interest in our products at the show, with several customers arranging factory visits on the spot. Beyond domestic buyers, we received inquiries from Saudi Arabia, the Middle East and Singapore. This is only our second time exhibiting, but we're already seeing its value in supporting our market development objectives.

Visitor Feedback

Guangzhou Risong Hokuto Automotive Equipment Co Ltd

Mr Dongming Li, Digital Department Product Manager

As a long-term participant of SPS - Smart Production Solutions Guangzhou, we consistently focus on cutting-edge technological advancements in the field of custom automation. The exhibition maintains close alignment with industry development trends, with this year's showcase of innovative technologies like humanoid robots being particularly remarkable. The international pavilion brings together leading manufacturers from Italy, Germany and other countries, offering attendees a global perspective on technological developments. Compared with other exhibitions in South China, SPS Guangzhou distinguishes itself through its larger scale and higher degree of international participation, establishing itself as a vital platform for fostering global exchange within the automation industry.

Xingtai Jinshahe Flour Co Ltd

Mr Ningyuan Wei, Information Specialist

As a traditional flour and noodle manufacturer, we came to the show looking for ways to digitalise and automate our operations. After two days of discussions, we've made excellent progress, and have found several potential partnership opportunities. The forum sessions were also valuable - the speakers offered great insights about business growth and new technologies, particularly about how to implement AI in our business.

Robotics Unit, Urban Harvest (India)

Mr Sujith Mohandas, Deputy General Manager

As specialists in robotics and vending solutions for the hospitality sector, we came seeking new robotics and automation technologies, along with component vendors for solutions we're developing in India. This has proven to be the most comprehensive exhibition of its type I've attended. We've made promising contacts, particularly in sensors, robotics, and automation, and the selection of exhibitors from Germany, Korea and China aligns well with our needs. The exhibition has proven well worth our time, and we look forward to returning in the future.

Dongfeng Nissan Passenger Vehicle Company

Mr Xinbing Wang, Director

As a long-term participant with over a decade of attendance at the SPS – Smart Production Solutions Guangzhou, we focus on innovation development in automation system integration. Through this event, we engage in in-depth exchanges with industry peers, acquire cutting-edge technological insights, and seek innovative solutions for secondary development. The event's international influence continues to grow, with this year's newly added Italian pavilion further enriching its global dimension. The concurrent forums offer forward-looking content, providing us with valuable learning and networking opportunities. We will continue leveraging this platform to stay abreast of industry trends and optimise technology applications.

Gree Electric Appliances Inc

Mr Yonglong Li, Team Leader

We have been consistently participating in the SPS – Smart Production Solutions Guangzhou since 2017, focusing on acquiring cutting-edge products, technologies and successful cases in digitalisation and industrial internet fields. The exhibition maintains close synchronisation with industry development trends. This year's event demonstrated enhanced international participation, featuring new exhibitors specialising in industrial internet and AI vision technologies. The forum brought together experts from Germany, Italy and professors from HKUST for knowledge exchange. As the most professional industry event in South China, its content depth perfectly aligns with our business needs, making it an indispensable annual platform for technical exchange and networking.

Visitor Analysis

attracted **998** international attendees from **82** overseas countries and regions including Asia, Europe, Africa, North America, and more (beyond Mainland China)

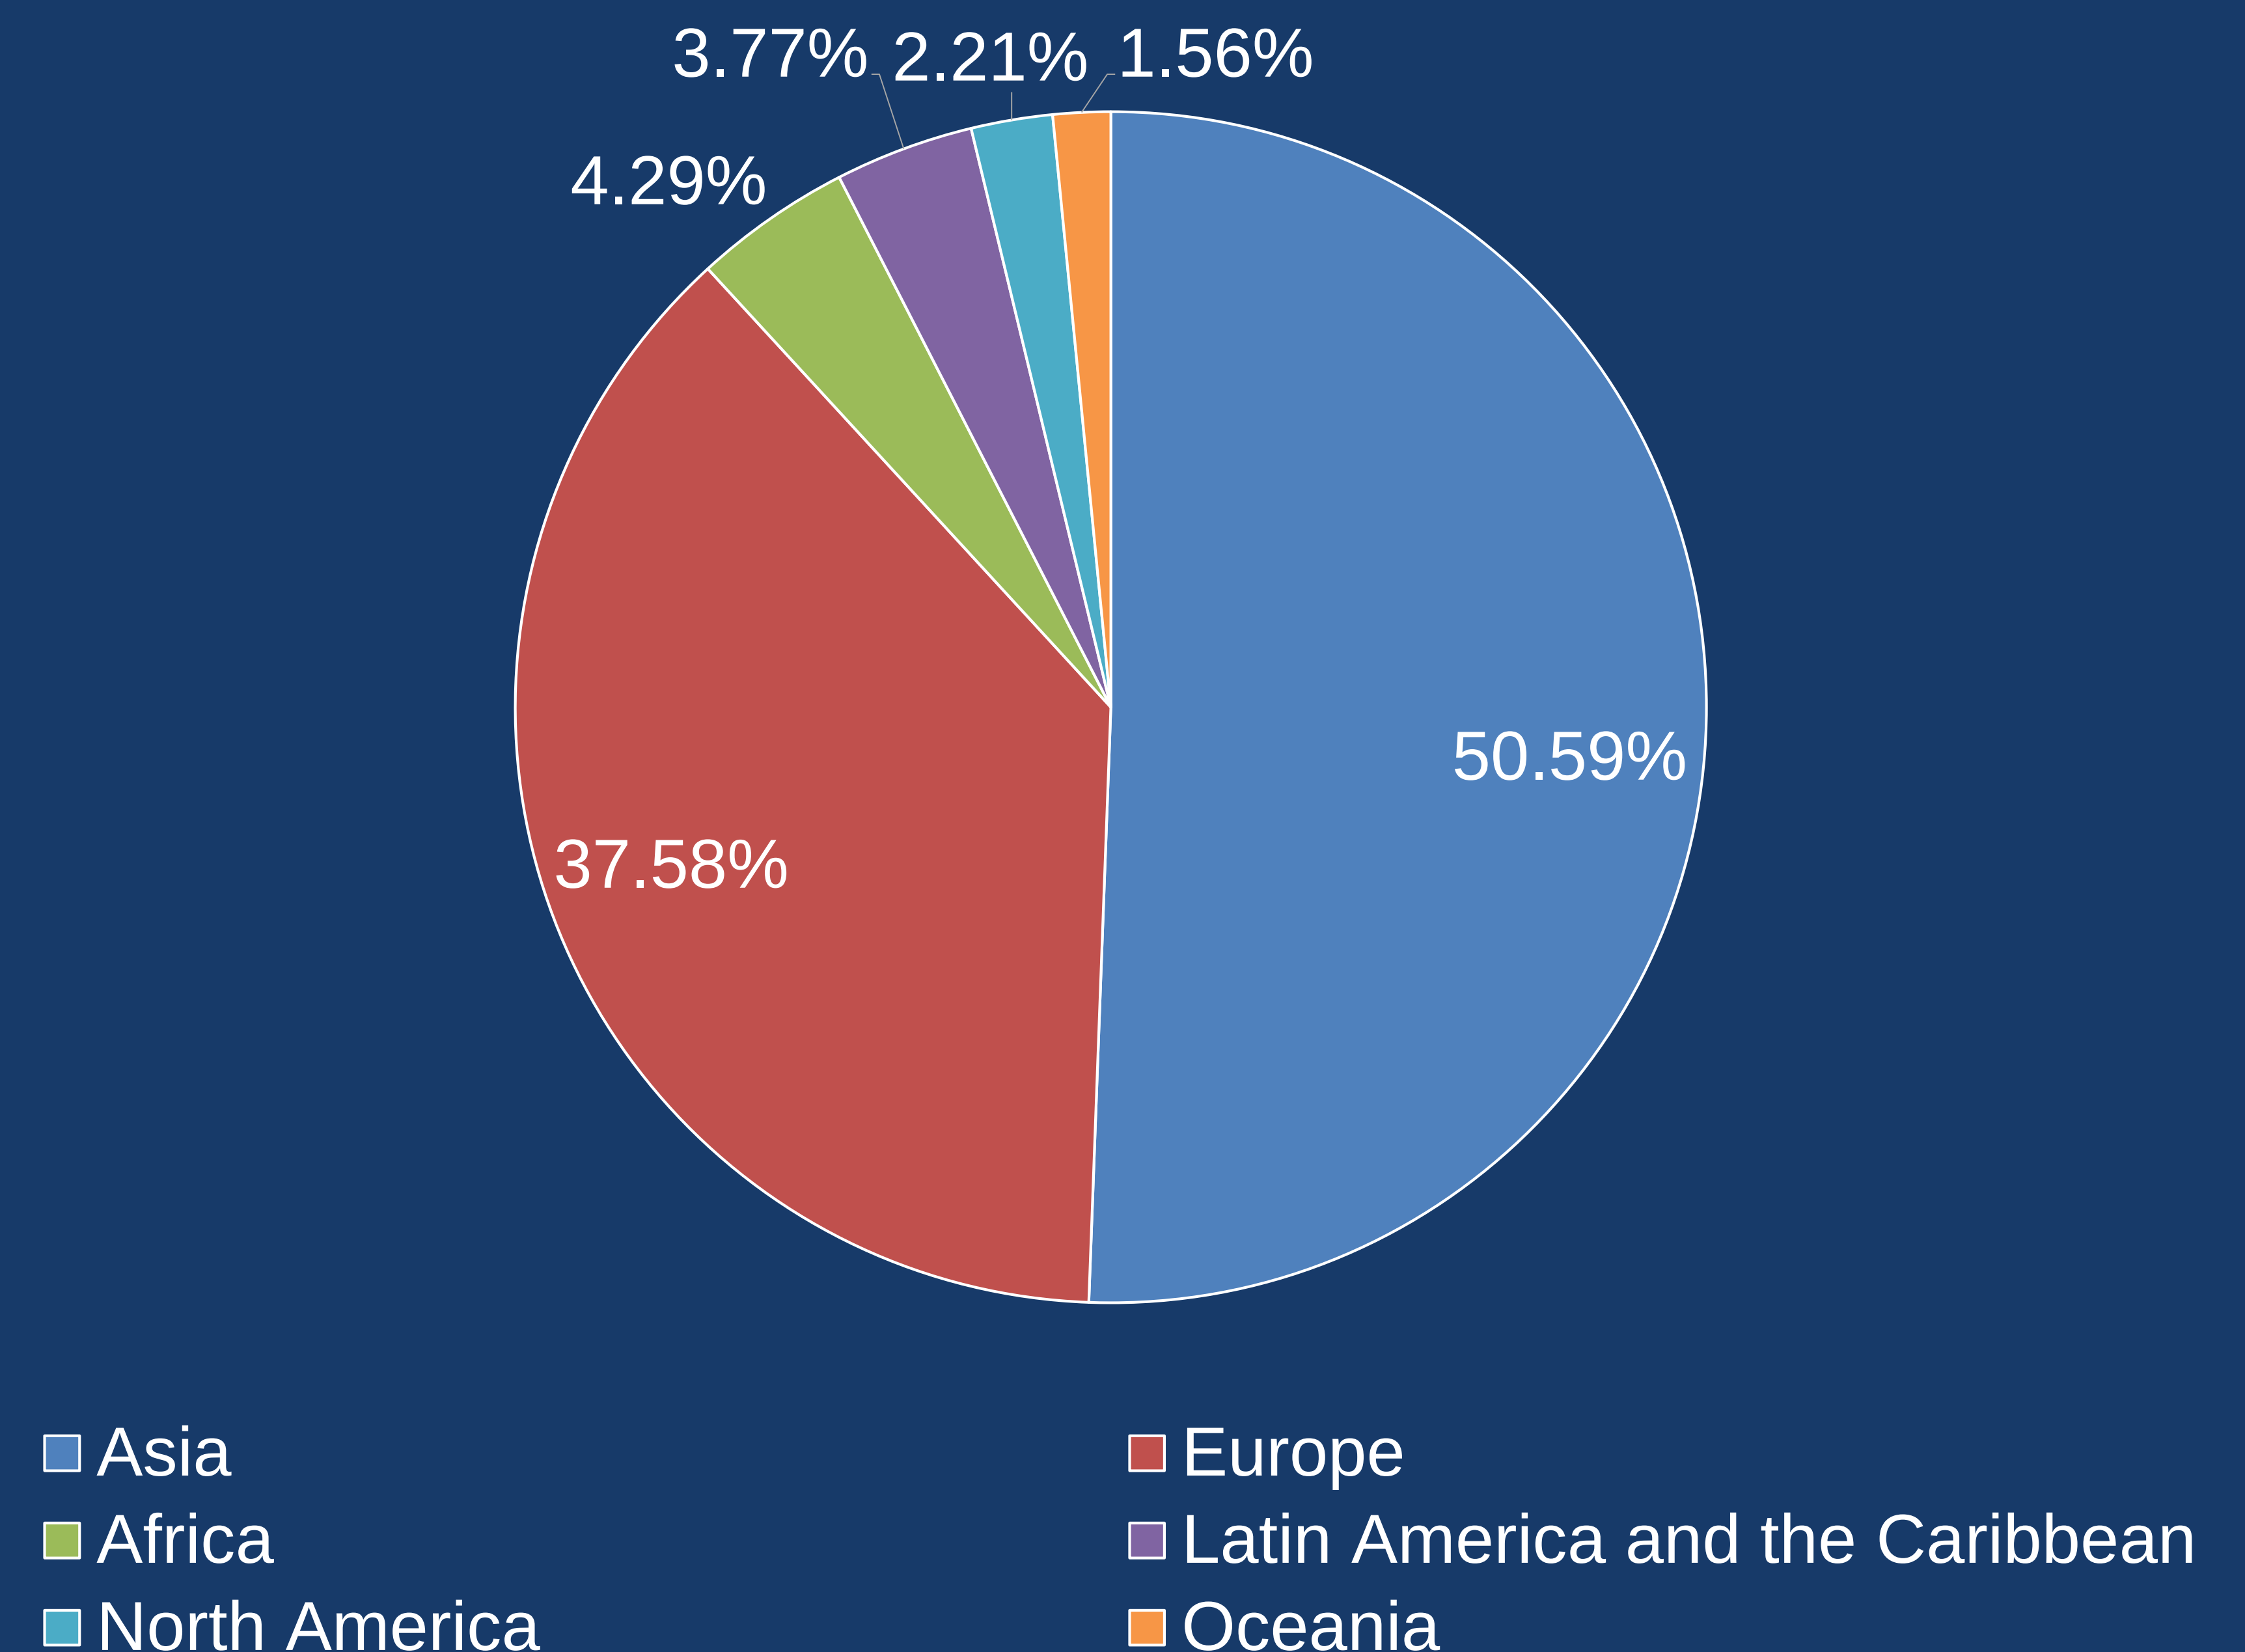

Total number of **17,602** enterprises represented by visitors

Attracted **39,127** professional visitors

The top **20** overseas countries and regions by audience count are:

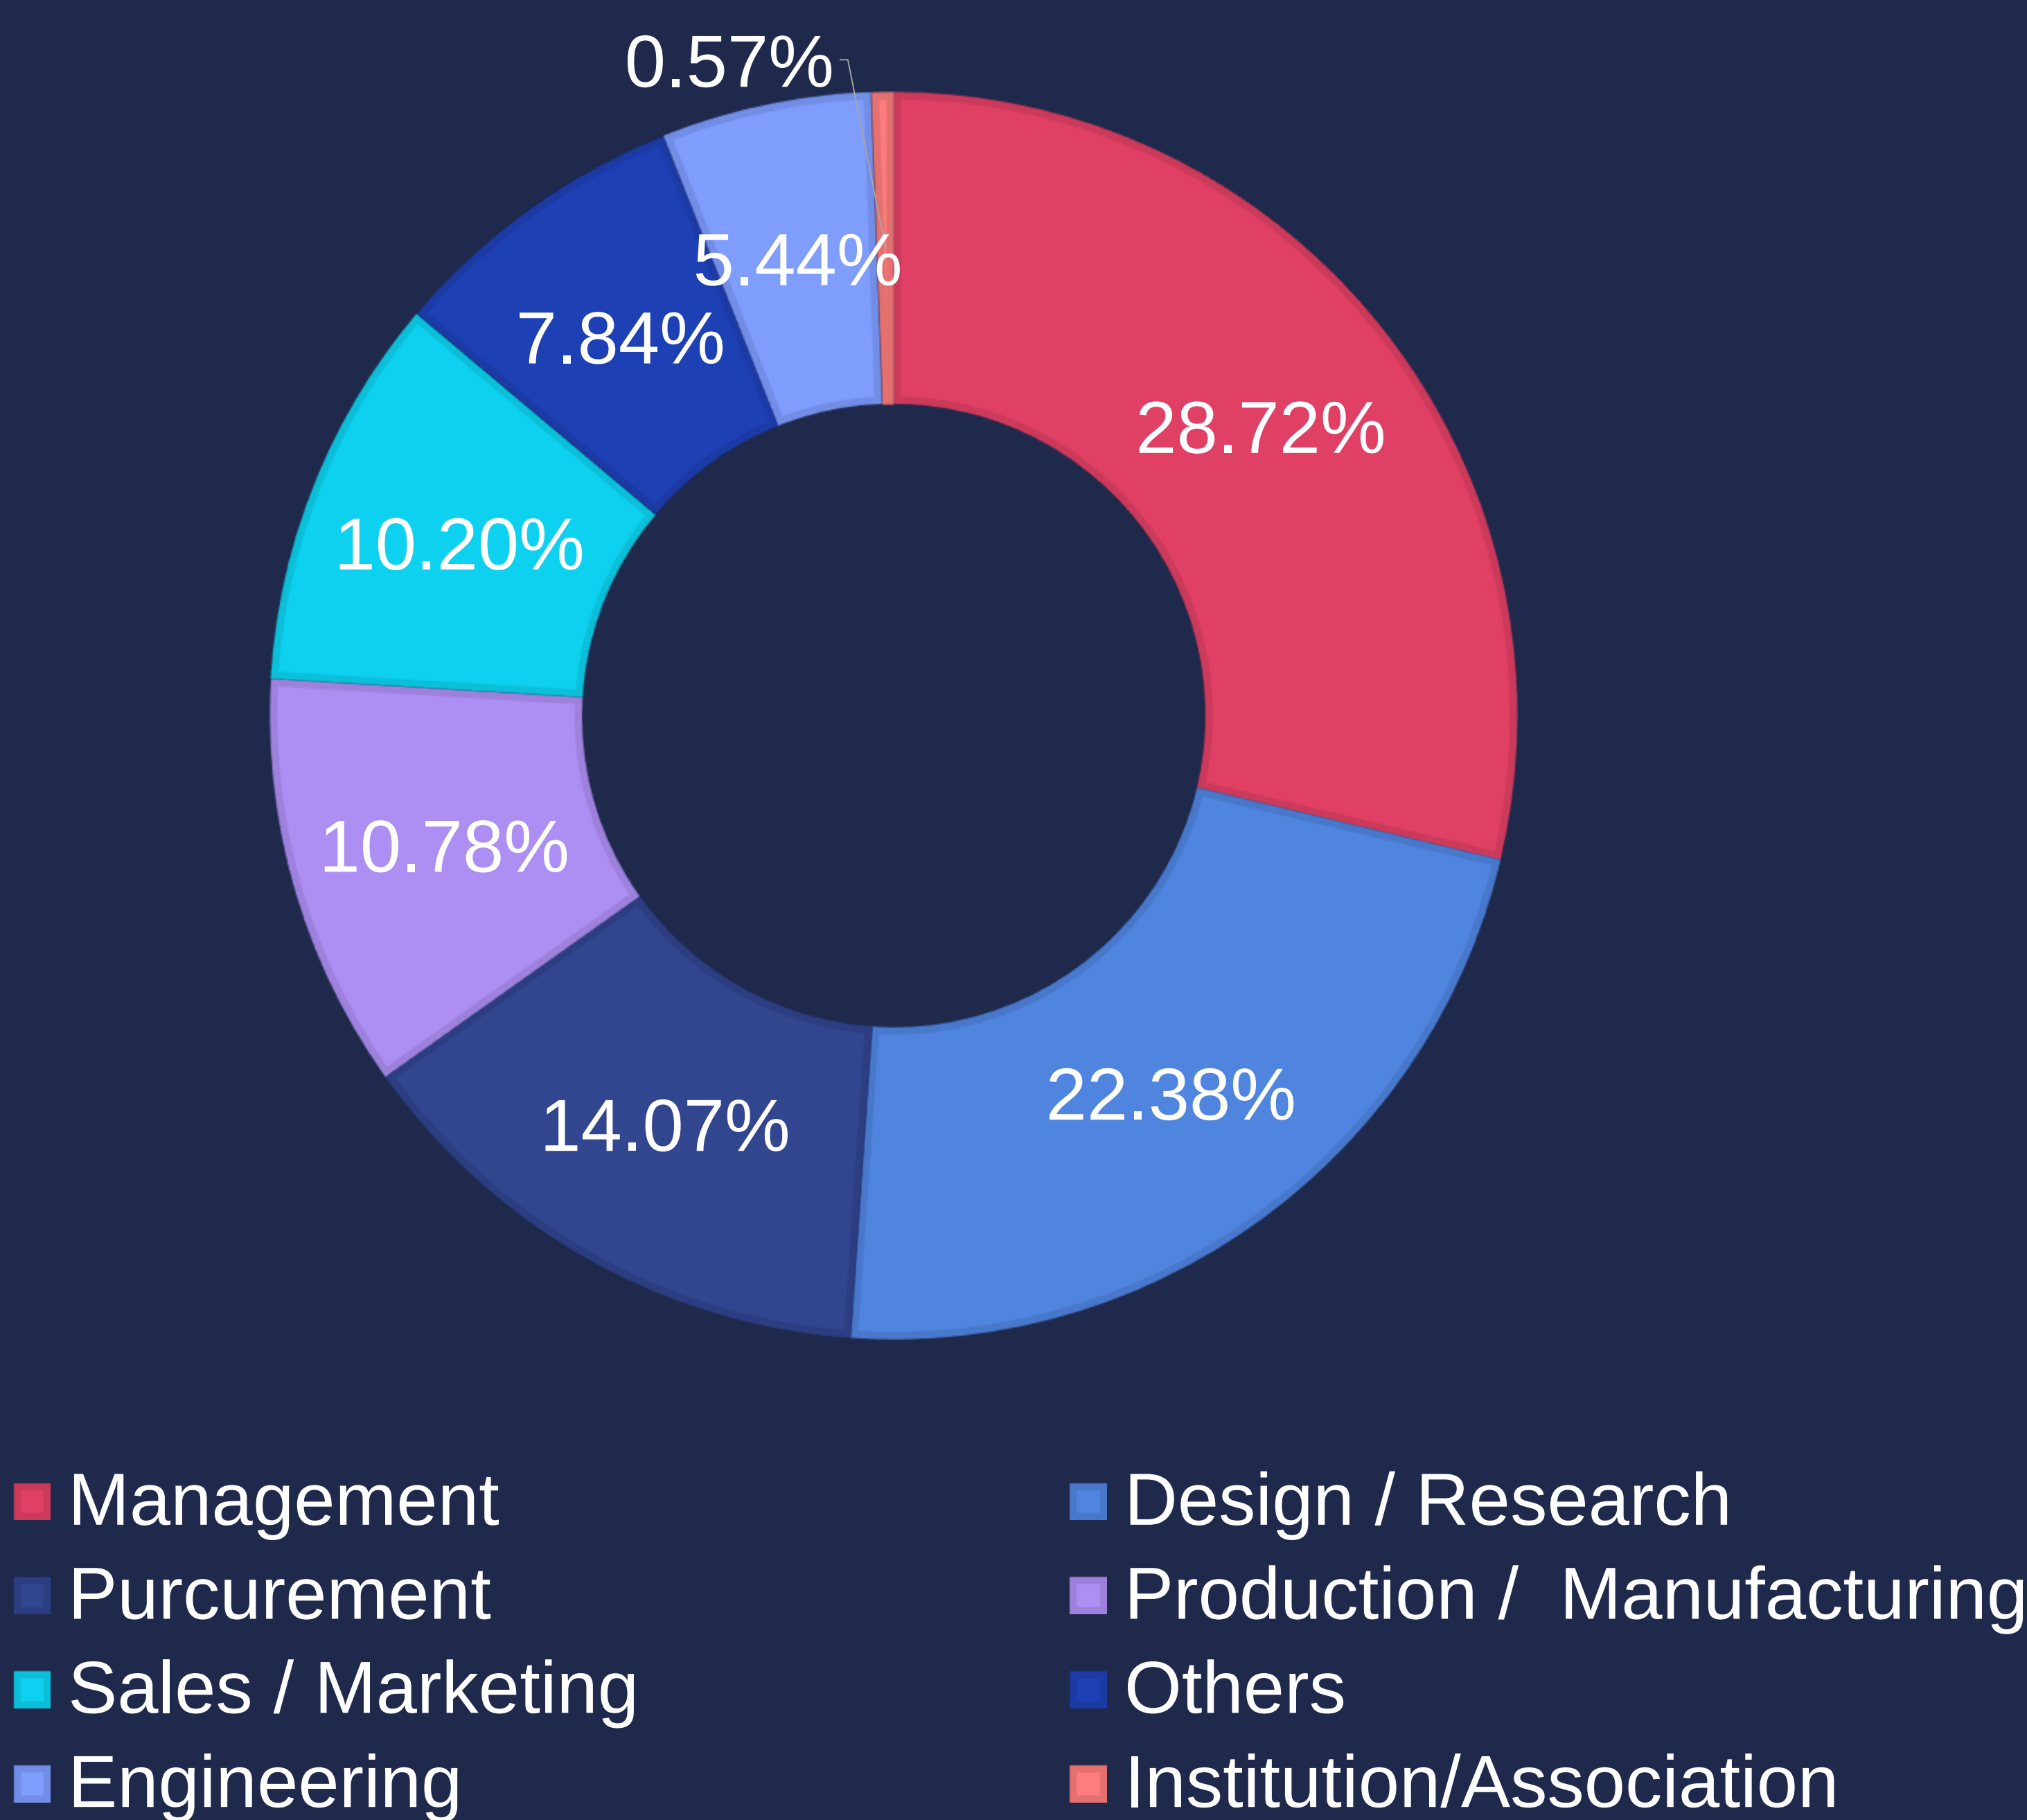

Eastern Europe, South Korea, Malaysia, Kazakhstan, India, Vietnam, Japan, Thailand, Saudi Arabia, Turkey, Indonesia, Australia, Angola, Kyrgyzstan, Tajikistan, Turkmenistan, the United States, Italy, Singapore, Spain.

Concurrent Events

Rockwell Automation (China) Company Limited

Mr Jason Dong, ESG & Sustainability Business Lead

During my presentation, the audience was highly engaged, especially when discussing ESG and sustainability, with many taking photographs and notes. The forum provides a valuable platform for advancing manufacturing, and these shared perspectives and experiences will help drive developments in our equipment and manufacturing sectors. Representing Rockwell Automation, a global authority in industrial automation and digital transformation, I was impressed by the organisers' thoroughness at every stage, from speaker management to content preparation, delivering a well-organised and efficiently executed event.

Valeo Automotive Air Conditioning Hubei Co Ltd

Mr Minmin Pang, TPT Jingzhou plant Production Process Manager

My first exhibition participation proved highly rewarding. As a component supplier for premium automotive brands including Mercedes-Benz and BMW, I gained valuable insights from industry-leading experts at the forum sessions, particularly regarding cutting-edge smart manufacturing technologies like AI large language models. These innovations offer significant reference value for enhancing our production efficiency and cost optimisation. The advanced technologies showcased at the event demonstrated strong alignment with market needs, providing fresh perspectives for our company's forthcoming technological upgrades.
